The "Content Gap" Analysis

0 Uploads

No content was uploaded throughout the 60-day internship duration.

Stagnant Growth

Limited organic growth is directly attributed to the lack of new activity.

Unfollow Trend

Audience churn occurred as followers didn't see new updates from the brand.

Potential

High reach to non-followers (92%) suggests strong growth potential if content is posted.

My Key Contribution

Designed Reel

I fully designed and conceptualized a Reel ready for upload to bridge the content gap and re-engage the audience.

Strategic Prep

While posting was restricted, the foundation for a consistent content schedule was prepared through research and draft designs.

Comparative Data Summary

Metric	Start of Internship	Current (End)	Difference
Views (Reach)	277	476	+199 (+71%)
Total Interactions	9	13	+4 (+44%)
Follower Count	~1,093	1,062	-31 (-2.7%)
Engagement Rate	Low	Moderate (Non-follow focus)	Improving Reach

Future Recommendations

To unlock growth, TYS must transition from 'observation' to 'action'. Consistent posting of the designed Reel is the critical first step.
