PROFESSIONAL SUMMARY

Aspiring to build a career in analytics-led marketing, business strategy, and techno-commercial roles. I aim to combine marketing expertise with data-driven decision-making to solve business problems and create measurable impact. I possess strong analytical, quantitative, and marketing capabilities, supported by proficiency in SQL, Python, Power BI, Tableau, Excel, and Databricks. My expertise includes market research, B2B marketing, brand management, key account management, digital strategy, and project management. I am skilled at translating complex data into actionable insights and identifying opportunities across customer, sales, and digital funnels. Currently pursuing a PGDM in marketing at JAGSoM, I have gained practical exposure to sales, marketing, and social media analytics. At Unschool, I analysed lead-conversion funnels to support business growth. At The Yellow Submarine, I contributed to content and brand strategy development. At The 4th Axis, I used social media performance and market research insights to support strategic recommendations. Through certifications and guided projects in data analytics, Agile/Scrum, SEO, CRM, cloud computing, Azure, Databricks, and project management, I am prepared to contribute at the intersection of marketing, analytics, technology, and business strategy.

INDRANIL MAJUMDER

RESUME

A final-year PGDM Marketing student at JAGSoM (Batch 2025–27), building a career at the intersection of analytics-led marketing, business strategy, and techno-commercial roles. He combines marketing expertise with data-driven decision-making — backed by hands-on proficiency in SQL, Python, Power BI, Tableau, Excel, and Databricks — to translate complex data into actionable insight across customer, sales, and digital funnels.

- Education: PGDM Marketing, JAGSoM (2025–27) | BA, West Bengal State University (70.70%, 2023) | Class XII, WBCHSE (90%, 2020)
- Core focus areas: Market research, B2B marketing, brand management, key account management, digital strategy, project management
- Internship experience: Unschool (Sales & Marketing, 6 mo) — lead-conversion funnel analysis | The Yellow Submarine (Social Media Marketing, 4 mo) — content & brand strategy | The 4th Axis (Social Media Analyst, 1 mo) — performance analytics & strategic recommendations

INDRANIL MAJUMEDR

<https://github.com/indra1250/indranil-majumder-portfolio>

RESUME

Beyond coursework, Indranil has applied his marketing-analytics skill set across live and academic ventures — from building e-commerce brands from the ground up to running a full empirical research study on export competitiveness — while building a broad technical and functional toolkit through certifications and guided projects.

- Academic & applied projects: Nomad Nibs (digital marketing & e-commerce, 5-member team — LinkedIn brand presence + e-commerce site) | Desi Protein (brand management & e-commerce — conceptualized a Desi-flavor protein brand with a dedicated e-commerce site) | Research Incubation — R&D Intensity, Digital Transformation & Export Competitiveness (8,808+ CMIE Prowess firm-year observations, regression modelling, built a Digital Intensity Index)
- Guided projects (Coursera): Business Analysis & Process Management, Project Management with ClickUp, Marketing Design with Easil, CRM with HubSpot, Project Management Tracker (Google Sheets), SEO with Squarespace
- Technical skills: Python (basic), SQL, HTML/CSS, Power BI, Tableau, Excel, Databricks, ETL pipeline development, Cloud Computing & Microsoft Azure, MySQL/PostgreSQL
- Marketing & growth tools: SEO (SEMrush, HubSpot), Meta Business Suite, Git/GitHub, Agile/Scrum
- Key certifications: Data Science with AI (PW Skills), Python Essentials 1 & 2 (Cisco), Agile Scrum (Simplilearn), Data Analytics Essentials (Cisco), Cloud Computing & Azure (IBM SkillsBuild, Simplilearn), CRM Systems (OnePageCRM, Simplilearn), SEO (HubSpot, SEMrush), SQL (Simplilearn), Databricks (Simplilearn)
- Leadership & involvement: Member, PR and Media Committee (JAGSoM Student Council) | Content Writer, PRARAMBH (JAGSoM's Magazine Team)

EDUCATION

2027

**Jagdish Sheth School
of Management
(JAGSoM)**

Pursuing a PGDM in Marketing at JAGSoM, Bengaluru, building capability across analytics-led marketing, brand strategy, and business decision-making.

2023

**West Bengal State
University**

Completed a Bachelor of Arts (General) — 70.70%, with coursework spanning fine/studio arts, history, political science, and English literature, alongside active involvement in the drama club and football team.

2020

Habra High School (H.S.)

Completed Higher Secondary Education (Science - PCM) under WBCHSE — 90%, building the analytical foundation carried into later academic work.

PERSONAL SKILLS

- **Programming & Data Analysis:** Python (basic), SQL, HTML, CSS
 - **Analytics & BI Tools:** Power BI, Tableau, MS Excel, Databricks, Databricks
 - **Data Engineering:** ETL Pipeline Development, Cloud Computing, Microsoft Azure
 - **Marketing & Growth Tools:** SEO (SEMrush, HubSpot), Meta Business Suite,
 - **Project & Collaboration Tools:** Git, GitHub, Agile/Scrum
- Databases: MySQL Server, PostgreSQL

CERTIFICATIONS

- Data Science with AI — PW Skills
- Python Essentials 1 and Essentials 2 — Cisco
- Agile Scrum Certification — Simplilearn
- Data Analytics Essentials — Cisco
- ADFAP — Tally Academy
- General English Course (Speaking, Writing, Effective Listening) — British Council
- SEO Certified — HubSpot Academy
- SQL — Simplilearn
- Facebook Marketing and Advertising (Meta Business Suite) — Simplilearn
- Content-led SEO — SEMrush Academy
- Advanced SEO Tool Optimization — SEMrush Academy
- Cloud computing & Azure – IBM SkillBuild, Simplilearn
- CRM System – OnePageCRM, Simplilearn
- Project Management – Coursera(Google)
- Databricks – Simplilearn

SOME OF THE IMPORTANT CERTIFICATES

Azure Fundamentals — Simplilearn | Microsoft
Successfully completed an online course covering core Azure cloud concepts and foundational Microsoft Azure services.

Get Started with Databricks for Data Engineering — Databricks | Simplilearn
Completed foundational training in Databricks for data engineering, covering core concepts and practical data engineering workflows.

Introduction to SQL — Simplilearn | SkillUp
Completed foundational training in SQL, developing skills in database concepts, querying, and data manipulation.

Sales CRM Expert Certification — OnePage CRM Sales Academy
Certified in the Next Action sales method, action-focused sales CRM usage, and sales process development.

Python Essentials 1 & 2 — Cisco Networking Academy & Python Institute
Certified in core Python programming fundamentals through advanced concepts, via the Cisco Networking Academy program.

Python Essentials 1 & 2 — Cisco Networking Academy & Python Institute
Certified in core Python programming fundamentals through advanced concepts, via the Cisco Networking Academy program.

SOME OF THE IMPORTANT CERTIFICATES

In recognition of the commitment to achieve professional excellence

Indranil Majumder

Has successfully satisfied the requirements for:

Journey to Cloud: Orchestrating your Solution

Issued on: Aug 17, 2026
Issued by: IBM SkillsBuild

Journey to Cloud: Orchestrating Your Solution — IBM SkillsBuild (Issued Aug 17, 2026)
Certified in designing and orchestrating end-to-end cloud solution deployments as part of IBM's cloud learning path.

Cloud Computing Fundamentals — IBM SkillsBuild (Issued Aug 17, 2026)
Certified in foundational cloud computing concepts and principles through IBM's SkillsBuild program.

INTERNSHIPS

Sales and Marketing_(Intern)_____2022

Unschool

- Identified and qualified prospective learners through outbound calls and messaging, contributing to lead generation efforts for the platform's course offerings.
- Assisted in executing digital marketing campaigns across social media and email channels, supporting increased visibility and engagement for course
- Tracked and analyzed lead conversion data to identify drop-off points in the sales funnel, providing insights to improve outreach strategy.
- Collaborated with the sales team to refine pitch messaging and follow-up processes, contributing to a more consistent and effective enrollment conversion.

Social Media Marketing_(Intern)____2026

The Yellow Submarine

- Developed and executed social media content calendars for client brands, aligning post themes with each brand's identity and target audience.
- Conducted competitor and market research to inform content strategy, helping identify positioning gaps and content opportunities for client accounts.
- Created and refined brand messaging and visual content guidelines, ensuring consistency across client social media platforms.
- Compiled a comprehensive internship report analyzing campaign performance and social media strategy, translating insights into actionable recommendations.

Social Media Analyst_(Intern)_____2026

The 4th Axis

- Monitored and analyzed social media performance metrics (engagement, reach, follower growth) across the brand's content, identifying trends among Bengali-speaking audiences.
- Conducted community engagement and digital outreach to strengthen audience interaction and brand presence on social platforms.
- Performed market research on regional digital media trends, providing strategic recommendations to improve content relevance and audience retention.
- Compiled analytics reports summarizing content performance, translating data into actionable insights that informed the brand's ongoing content strategy.

INTERSHIPS

INTERSHIP CERTIFICATES

the yellow submarine.

CERTIFICATE OF APPRECIATION

This is to certify that Mr. Indranil Majumder was associated with The Yellow Submarine as a Social Media Marketing Intern for a period of three months, from 9 March 2026 to 09 June 2026.

During this period, he contributed to various social media marketing activities, including social media assessment, community engagement, digital outreach, market research, analytics reporting, and strategic recommendations aimed to strengthen The Yellow Submarine online presence and audience engagement.

We appreciate his efforts and wish him continued success in his future academic and professional endeavors.

Priyanka Sil
Co-Founder
The Yellow Submarine

Date: 09 June 2026
Place: Kolkata

hello@theyellowsubmarine.inwww.theyellowsubmarine.in

Certificate of Appreciation — The Yellow Submarine (Mar–Jun 2026)
Recognized as Social Media Marketing Intern for contributions across social media assessment, community engagement, digital outreach, market research, analytics reporting, and strategic recommendations.

Brand: 

To Whom It May Concern

We are pleased to recommend Mr. Indranil Majumder, who completed a four-week internship as a Social Media Analyst at The Media Content House for our brand The Fourth Axis. During his internship, he demonstrated strong analytical abilities, professionalism, and a keen interest in social media and digital marketing. He effectively assisted with monitoring social media performance, analysing engagement metrics, and providing valuable insights to support our marketing efforts.

Mr. Indranil Majumder was a quick learner, worked well with the team, and consistently approached tasks with dedication and attention to detail. We're confident that he will be a valuable asset in any future academic or professional endeavour and highly recommend him for relevant opportunities.

Best wishes.

Sincerely,
Subhro Sarvin
Chief Editor, COO
The Media Content House
Brand- The Fourth Axis
Kolkata, West Bengal, India

- Create a Project Management Tracker using Google Sheets – Coursera(guided)
- Search Engine Optimization (SEO) with Squarespace – Coursera(guided)

ACADEMIC PROJECT (1)

Nomad Nibs — Digital Marketing & E-commerce Project | 2026

- Worked as part of a five-member team to develop the brand's digital presence.
- Created and managed the Nomad Nibs LinkedIn page to support brand communication and visibility.
- Contributed to the development of an e-commerce website for palm-oil-free and vegan chips.
- Project Link: <https://www.nomadnibs.in/>

ACADEMIC PROJECT (2)

Desi Protein — Brand Management & E-commerce Project | 2026

- Conceptualized a digital-first protein brand offering products inspired by Indian/Desi flavors and consumer preferences.
- Developed an e-commerce website focused on brand positioning, product presentation, and customer experience.
- Applied digital marketing, consumer behavior, branding, and e-commerce principles to translate the concept into a cohesive digital business proposition.
- Project Link: <https://desiprotein-preview.preview.emergentagent.com/>

SOCIAL IMMERSION PROGRAM (SIP)

As part of JAGSoM's Social Immersion Programme (SIP) — a mandatory field-based capstone in the PGDM Marketing curriculum — I led a marketing and analytics-driven intervention for Prime Educational and Social Trust, a grassroots NGO in Puducherry running the Janani Home for Girls shelter and several community education initiatives. Over a 10-day, on-ground engagement with Group 10, we diagnosed why a genuinely high-impact organisation was struggling to convert its ground-level work into donor visibility and funding, and then designed and delivered a self-sustaining digital operating system the Trust could run on its own long after we left. This case study captures the problem, my approach to diagnosing and solving it, what I personally built, and what it demonstrates about my capability in marketing strategy, data-driven decision-making, and stakeholder-centred execution.

- The structural problem: Grassroots NGOs in India operate under a "capability-visibility gap" — organisations doing meaningful frontline work (shelters, tailoring centres, evening schools) simply don't have the bandwidth or in-house digital expertise to communicate that work convincingly to funders.
 - Diagnostic findings from our situation analysis: 10 active fundraising projects on GlobalGiving were static and rarely updated, causing weak international donor conversion
 - Instagram and Facebook presence existed but posted irregularly with no cohesive brand narrative, missing younger, digitally-native donors and volunteers
 - Student and beneficiary data for evening schools lived in fragmented manual spreadsheets, slowing CSR audit reporting and increasing error risk
 - No repeatable process existed for identifying or approaching CSR departments across Puducherry and Tamil Nadu — outreach was reactive, not strategic
- Four-pronged problem definition: Fragmented Digital Presence, Operational Data Silos, Non-Standardised CSR Outreach, and — the most strategically important insight — Knowledge Perishability: every past intern or volunteer brought temporary digital skills that left with them, leaving Prime Trust structurally incapable of compounding its digital capability over time.

(SIP) - CONTINUATION

Rather than defaulting to the obvious short-term fix — simply managing the NGO's social accounts for the visit's duration — I pushed the team toward a solution architecture that would outlive our presence. We evaluated three alternatives through a formal Techno-Economic Viability (TEV) framework, scoring each on technical feasibility and economic viability so the recommendation to the Trust and to JAGSoM was evidence-based rather than opinion-based — a structured, quantified decision-making approach I now default to whenever choosing between marketing initiatives with competing resource claims.

- Alternatives evaluated: Direct Content Management (fast but purely temporary; scored lowest on sustainability) · Professional Content Production (technically sound, economically unviable for the Trust) · Sustainable Capacity Building (recommended) — durable, transferable assets: a social media handbook, CSR proposal templates, automated Excel dashboards, and video tutorials. Scored 92/100 on the TEV matrix, driven by zero capital expenditure, zero recurring cost, and direct resolution of the knowledge-perishability root cause.
- The final solution — Prime Trust Digital Empowerment Suite (bundling all three evaluated options so capacity-building, revenue generation, and brand visibility were addressed simultaneously):
 - Skill Tutorial Video Library — 10+ screen-capture tutorials on Excel (donor/student data management), PowerPoint (donor presentations), and Canva (social content), built entirely on tools already on the NGO's hardware
 - AI Usage Guide for NGO Staff — practical training on ChatGPT and Perplexity for drafting reports, newsletters, and donor correspondence, positioning AI as a force multiplier for a two-person admin team
 - CSR Outreach Toolkit — a structured SOP and contact database for CSR departments across Puducherry and Tamil Nadu, with proposal templates for all 10 of the Trust's projects, aligned to Section 135 of the Companies Act
 - Instagram Content Strategy & Social Media Handbook — a storytelling-first framework with ready-to-edit Canva templates, shifting content from generic "event photos" to donor-resonant "impact stories," designed for staff to run independently with free tools
- Measured impact: delivered a fully TEV-scored recommendation (92/100) rather than unstructured suggestions · converted an ad-hoc, founder-dependent presence into a documented, repeatable system · produced ready-to-send CSR proposals for all 10 live projects, each meeting statutory compliance · embedded AI into daily NGO operations at zero cost · received a formal Letter of Appreciation from Prime Trust, with the project's LinkedIn reflection featured in JAGSoM's SIP 2026 cohort showcase. Because the intervention required zero capital expenditure and zero recurring cost, its impact is structurally durable — the Trust's digital capability doesn't degrade once the 10-day window closes.

(SIP) - CONTINUATION

This project reshaped how I think about the purpose of marketing. Working directly with the children at Janani Home for Girls — including facilitating a sensitive "Good Touch and Bad Touch" awareness session — and watching women at the Akshaya Tailoring Centre build livelihood skills made the stakes of "visibility" tangible in a way no classroom case study could. It reframed a well-structured Instagram post or an automated data sheet not as a marketing deliverable, but as the mechanism by which a child receives a scholarship or a school gets a roof — a shift from marketing-as-commercial-tool to marketing-as-instrument-of-access that I now carry into every subsequent brief.

- Strategic & Analytical: structured problem framing via situation analysis and root-cause breakdown · TEV analysis to quantitatively compare competing strategic options · translating a resource-constrained brief into a scoped, deliverable-based architecture
- Marketing & Communications: content strategy and storytelling frameworks tailored to donor acquisition · CSR proposal writing aligned to statutory compliance · stakeholder communication across NGO staff, children, and corporate CSR contacts
- Data & Tools: Excel-based data management and dashboard automation · applied use of AI tools (ChatGPT, Perplexity) for operational efficiency · non-designer-friendly Canva template systems built for handover and reuse
- Leadership & Execution: field-based execution under a fixed 10-day timeline · knowledge-transfer design built for sustainability and independence rather than short-term service delivery
- Key learnings: marketing = access, not just promotion · diagnose root causes, not symptoms · structured decisions beat gut calls · design for sustainability, not just delivery · treat constraints as design inputs · adoption depends on simplicity · match format to how people learn · ground-level exposure builds real conviction · honesty about limitations builds credibility

CERTIFICATE OF SIP

**Certificate of Internship — Prime Educational and Social Trust & Janani Home for Girls,
Puducherry (10–18 Apr 2026)**

**Completed a 9-day Social Immersion Programme internship as part of JAGSoM's PGDM
curriculum, gaining experiential exposure to the Trust's social work and community
development activities.**

Completed a 9-day Social Immersion Programme internship as part of JAGSoM's PGDM curriculum, gaining experiential exposure to the Trust's social work and community development activities.

INDRANIL MAJUMDER

<https://github.com/indra1250/indranil-majumder-portfolio>

RESEARCH INCUBATION(RI)

As part of my Research Incubation project at JAGSoM (mentored by Dr. Banantika Datta), I designed and ran a firm-level empirical study on R&D Intensity, Digital Transformation, and Export Competitiveness: Evidence from Indian Firms. The core question carries real strategic weight for Indian industry and policy: do R&D spending and digital infrastructure investment actually make Indian firms more competitive exporters, or is export success driven by more structural factors — the industry a firm sits in, its supply chain, and its people? Using eleven years of firm-level financial data from the CMIE Prowess database (2014–2025), I built and estimated seven regression models to test this rigorously rather than anecdotally, filling a genuine literature gap — no prior study had combined a composite Digital Intensity Index with R&D and royalty-licensing data to compare their effects before and after the COVID-19 digital-adoption shock.

- RQ1: Are R&D intensity and technology-licensing (royalty) payments associated with export volume, intensity, participation, and service-export likelihood — and is this effect stronger in technology-intensive sectors (electronics, software, R&D services)?
- RQ2: Is a composite Digital Intensity Index (software, IT-enabled services, ISP, data centre, satellite/VSAT costs) associated with export intensity and participation — and does this differ between manufacturing and services firms?

RI - CONTINUED

Rather than relying on a single regression, I built a battery of seven models spanning OLS (continuous outcomes) and logistic regression (binary outcomes), each with industry fixed effects at the two-digit NIC level. I cleaned 9,281 firm-year observations from an original pull of ~38,000, split the sample into pre-pandemic (2014–2019) and post-pandemic (2020–2025) periods, and constructed the Digital Intensity Index by standardising five spend categories into z-scores to avoid multicollinearity. The most important discipline throughout was following the data even when it contradicted the popular "innovation drives exports" narrative — several hypotheses did not hold up, and reporting that honestly mattered more than forcing a tidier story.

- Findings that held up: R&D spending positively linked to export volume post-pandemic (1% rise in R&D → ~0.06% rise in exports, $p = 0.002$) · sectoral identity mattered enormously (pharma, apparel, food & beverages, chemicals exported significantly more; construction significantly less) · imported raw material intensity raised export odds by ~5.9% · salary/wage expenditure consistently predicted export participation and service exports
- Findings that did not hold up: Digital Intensity Index showed no significant link to export intensity or participation in either period · royalty/tech-licensing payments showed no significant export effect · R&D did not pay off more in technology-intensive sectors specifically · digital investment's export effect did not differ significantly between manufacturing and services firms

RI - CONTINUED

This project taught me the difference between a plausible story and a defensible one. I expected R&D and digital spending to be the headline drivers of export success — the data pushed back hard, and the more valuable skill built wasn't running the regressions but resisting the urge to spin null results into something they weren't. Sectoral identity, supply-chain integration, and workforce quality mattered more than the "innovation" variables everyone assumes matter most — a genuinely useful, if less flattering, lesson in letting evidence override intuition.

- Strategic implications: firms in established export sectors should keep investing in R&D to reinforce existing advantage; those without one need a competitive product first, not R&D alone · supply-chain integration is a faster, cheaper path to export-readiness than large R&D outlays · high digital spend isn't a differentiator by itself — allocation matters more than magnitude · policymakers should favor targeted, sector-aware support over broad R&D subsidies
- Skills demonstrated: designing/estimating multiple OLS & logistic models with fixed effects on a 9,000+ observation panel · constructing standardised composite indices · structuring research around a clear literature gap · pre-/post-shock comparative design · transparent reporting of null/contradictory results · translating statistical output into corporate and policy implications
- Key learnings: popular narratives don't always survive real testing · being willing to be wrong is part of rigorous research · structural factors often beat the "exciting" variables · statistical significance $\neq$ real-world relevance · correlation isn't causation — say so plainly · good research ends in a decision, not just a coefficient

COMPETITION AND VOLUNTEERING

COMPETITIONS

Aakriti 2k25 — 1st Place Winner

Arihant Institute of Commerce and Management, Bengaluru

Investors Tank — Aakriti 2k25, Arihant Institute of Commerce and Management (Nov 2025) — *First Place*

- Competed in Investors Tank, an investment-pitch competition at Aakriti 2k25, presenting a structured investment case to a panel of judges as part of a 3 member team representing JAGSoM.
- Secured first place among participating teams from multiple institutions, demonstrating the ability to build and defend a compelling investment thesis under competitive, time-bound conditions.
- Contributed to structuring the investment narrative and articulating the case clearly to a judging panel — combining financial reasoning with persuasive communication.
- Represented JAGSoM at an external inter-collegiate platform, reflecting strong analytical and presentation skills valued in finance, consulting, and analytics-driven roles.

Kanyathon

Jagdish Sheth School of Management (JAGSoM), Race Management Department

- Volunteered for the student-driven annual charity run.
